PROFILE

MERN Stack Developer passionate about creating scalable and reliable web apps. I'm an expert at creating dynamic, user-focused interfaces and effective full-stack systems using Express.js, React, Node.js, and MongoDB. My specialty is using the MERN stack to its fullest capacity in order to provide superior solutions that satisfy the changing demands of contemporary companies.

EXPERIENCE

Real-Time Chat Application | Personal Project

Developed a full-stack chat app using React, Node.js, Socket.io, MongoDB with real-time messaging, user authentication, and end-to-end message encryption.

Implemented message history, and multimedia support (images) with cloud storage integration.

Designed a responsive UI with features like online status.

Smart Notes & Task Manager Web Application | Personal Project

Developed a full-stack web app using React, Node.js, MongoDB with secure user authentication and encrypted data storage.

Developed a rich UI for note-taking with CRUD functionality and implemented task management features with deadlines/priorities.

Integrated data visualization to display task completion statistics via interactive pie charts.
